Tooling			
Pre-commit time tools			
In this section you can find lifecycle helpers, precommit hook tools and threat modeling tools. Threat modeling tools are specific category by themselves allowing you to simulate and discover potential gaps before you start to develop the software or during the process. Modern DevSecOps tools allow using Threat modeling as code or generation of threat models based on the existing code annotations.			
Name	URL	Description	Meta
git-secrets	https://github.com/jawslabs/git-secrets	AWS labs tool preventing you from committing secrets to a git repository	View Edit
git-hound	https://github.com/tillson/git-hound	Searchers secrets in git	View Edit
goSDL	https://github.com/slackhq/goSDL	Security Development Lifecycle checklist	View Edit
ThreatPlaybook	https://github.com/jew45/ThreatPlaybook	Threat modeling as code	View Edit
Threat Dragon	https://github.com/OWASP/threat-dragon	OWASP Threat modeling tool	View Edit
threatspec	https://github.com/threatspec/threatspec	Threat modeling as code	View Edit
pytm	https://github.com/zar/pytm	A Pythonic framework for threat modeling	View Edit
Threagile	https://github.com/Threagile/threagile	A Go framework for threat modeling	View Edit
